

# Reza Abdollahipour

Palacký University – Czech Republic / Iran

Reza got a Ph.D. in Kinanthropology (motor control & learning) at the Faculty of Physical Culture, Palacký University Olomouc.

Reza's research is on attentional and motivational factors that enhance motor performance and learning of motor skills in different populations. Particularly, Reza is interested in conducting experimental research on healthy individuals, individuals with

visual/hearing impairments, and children with developmental coordination disorders.

Reza has been Iran's national coach and international judge in aerobic gymnastics.

## **My Topics for the 18th International Teaching Week:**

- 1) The Influence of Autonomy Support and Enhanced Expectancy on Motor Performance and Learning
- 2) The Influence of Attentional Focus Instructions on Motor Performance and Learning
