

# Shahab Parvinpour

**Kharazmi University, IRAN**

Shahab Parvinpour graduated in Physical Education and Sport Sciences from Kharazmi University in 2007 and got his master's degree at Motor Behaviour (2009) from the same faculty. He received his PhD in Motor Behaviour from University of Tehran and is currently teaching motor learning and motor development related courses in both graduate and postgraduate levels at Motor Behaviour department of Kharazmi University.

His professional interests focus on early childhood motor interventions, nonlinear pedagogy, dyadic learning, and observational learning and his current projects include:

- Effects of a developmental task constraints intervention on emergence of kinematic synergies during two-hand catching in children with developmental delays
- Biomechanical adaptations in two-hand catching following developmental task constraints in children with motor development delays
- Effects of environmental and task constraints on perceptual-motor calibration development in children

## **Topics for the 14<sup>th</sup> International Teaching Week:**

- 1. Challenge Point Framework: Theoretical Basis**
- 2. Challenge Point Framework: Practical Implications**
