

Rasoul Yaali

Kharazmi University

Iran

Rasoul has received his Ph.D. in Sports Sciences in 2012 from Kharazmi University and he has been working at this university since then. His area of research is motor learning and control. He is currently working on new educating methods in typical and atypical person such as "nonlinear pedagogy, CLA, DL and so on", and also the role of these methods in motor learning, motor creativity, injury prevention and health of person and improving quality of life of people with developmental disorder. He has been a player of the Iranian national badminton team in the past, and as a coach and player, he has the experience of winning the championship in the Iranian Badminton Premier League.

My Topics for the 21st International Teaching Week:

- 1) The application of game theory in measuring creativity
- 2) The effect of flow state in motor learning and performance
