

Reza Abdollahipour

Palacký University Olomouc
Czech Republic / Iran

Reza did his PhD in Kinanthropology (motor control & learning) at the Faculty of Physical Culture, Palacký University Olomouc, Czech Republic.

Reza's research is on attentional and motivational factors that enhance motor performance and learning of motor skills in different populations. Particularly, he is interested in conducting experimental research on healthy individuals, individuals with visual/hearing impairments, and children with developmental coordination disorders. Reza has been Iran's national coach and international judge in aerobic gymnastics.

My Topic for the 22nd International Teaching Week:

- 1) The Influence of Motivation on Motor Performance
